

EMS-OHSAS Policy

As a member of an international group of companies, VALEO Auto-Electric Hungary Kft. designs and produces for the world's leading automotive companies high-quality switches, electronic control units and camera control units using the most advanced technologies.

VALEO Auto-Electric Magyarország Kft acknowledges – as a fundamental value - the importance of the environmental protection, health and safety and the sustainable development, furthermore the economic and social importance thereof. To this end it has implemented, operates and maintains an EMS-OHSAS Integrated System.

The aim is to achieve the continuous improvement of the performance of EMS-OHSAS to the satisfaction of all the interested parties on the basis of regular inspection of the environmental factors and risks.

VALEO Auto-Electric Magyarország Kft. defines the following directives and tasks in the EMS-OHS policy, in line with the „5 Axes strategy” of the Group:

We strive for continuous tracking of the relevant environmental, occupational safety and health laws and other compliance obligations, to comply with them and to enforce them. For the satisfaction of our interested parties, we carry out our activity in compliance with the compliance obligations.

We consider important to disseminate Group directives that aim to improve risk management.

We ensure that our Code of Ethics is distributed to our suppliers and subcontractors.

We establish our annual goals and programs in order to reduce our environmental effects and risks, and to develop continuously the environmental management system, occupational health and safety.

We ensure the required financial and other resources to provide for environmentally conscious, healthy and safe working, and to implement the goals and programs.

Our objectives are basically, but are not limited to: reducing the environmental and health damaging effects caused by the activities, and preventing the environmental pollution. Reducing the quantity of waste produced, operating a system of selective collection of waste, optimum exploitation of the natural resources, and energy rationalization.

We strive for optimizing the transportation of people and products in order to reduce greenhouse gas emissions.

We ensure the education and training of our employees and sub-contractors to make them recognize and reduce the risks and their activities and the effects there of on the environment, and also they can contribute to the improvement of our company's environmental performance.

We communicate openly with customers, suppliers, authorities and interested parties in order to optimize environmental protection, workplace safety and working conditions.

We realize regular external and internal audits in order to evaluate the execution of corresponding obligations, and to detect in time, eliminate and overcome environmental, work safety and health hazards.

Valeo has been engaged in a process of sustainable development, in line with the principles of the United Nations Global Compact. The process covering environmental responsibility, corporate social responsibility and commitment to society.
