

Our Policy

As a member of an international group of companies, VALEO Auto-Electric Hungary Kft. designs and produces for the world's leading automotive companies high-quality products.

VALEO Auto-Electric Magyarország Kft acknowledges – as a fundamental value - the importance of the environmental protection, health and safety and the sustainable development, furthermore the economic and social importance thereof. To this end it has implemented, operates and maintains an EMS-OH&S Integrated System. The aim is to achieve the continuous improvement of the performance of EMS-OH&S to the satisfaction of all the interested parties on the basis of regular inspection of the environmental factors, environmental and occupation of safety risks.

Environmental Management System (ISO 14001)

Occupational Health and Safety Management System (ISO 45001)

VALEO Auto-Electric Magyarország Kft. defines the following directives and tasks in the EMS-OH&S policy, in line with the „5 Axes strategy” of the Group:

We strive for continuous tracking of the relevant environmental, occupational safety and health, fire safety laws and other compliance obligations, to comply with them and to enforce them. For the satisfaction of our interested parties, we carry out our activity in compliance with the compliance obligations.

We consider important to implement and adhere to the HSE Group directives, objectives and orientations that aim to improve risk management.

We ensure that our Code of Ethics is distributed to our suppliers and subcontractors.

We establish our annual goals and programs in order to reduce our environmental effects and risks, and to develop continuously the environmental-, occupational health and safety management system, furthermore we are determined in order to ensure secure and healthy workplaces.

We ensure the required financial and other resources to provide for environmentally conscious, healthy and safe working, and to implement the goals and programs.

Our objectives are basically, but are not limited to: reducing the environmental and health damaging effects caused by the activities, preventing the environmental pollution and accidents. Reducing the quantity of waste produced, operating a system of selective collection of waste, optimum exploitation of the natural resources, preparing for emergency situations and energy rationalization.

We are committed to fulfilling the Valeo Group's carbon neutrality program. (CAP 50)

We strive to reduce greenhouse gases and to optimize the transport of people and products.

We ensure the education and training of our employees and sub-contractors to make them recognize and reduce the risks of their activities and the effects there of on the environment, and also they can contribute to the improvement of our company's environmental performance.

We communicate openly and consult continuously with site safety representatives, customers, suppliers, authorities and interested parties in order to optimize environmental protection, workplace safety and working conditions.

We realize regular external and internal audits in order to evaluate the execution of corresponding obligations, and to detect in time, eliminate and overcome environmental, work safety and health hazards.

Valeo is committed to sustainable development and accepts the 10 principles of Universal Social Responsibility set out by the United Nations. The process covering environmental responsibility, corporate social responsibility and commitment to society.
